Director of Instructional Support, General Education

Treya Allen
DEI-Focused Instructional Support Coordinator
General Education
What we’re doing today:

- Quick Polls
- Course Objectives
- Signature Assignments
- Pedagogical Approach
Quick Poll: What are you most curious about?

- Course outcomes and objectives
- Signature assignments
- Pedagogical approach
- All the above
Quick Poll: What would be most helpful today?

- Focusing on wrapping our heads around what signature assignments and course objectives are and how they work in GE
- Focusing on examples
- Workshopping ideas and/or materials I have started
SLOs and COs

Student learning outcomes are where we want student to **arrive**.
Course objectives are the learning experiences students will **engage in to get there**.
Student Learning Outcomes and Course Objectives

Student Learning Outcomes (fixed)
detailed, measurable description of what students should be able to
do and/or demonstrate upon completing your course.

Course Objectives (flexible)
describe what students can expect to engage with during the
course and should highlight the unique pathways students will take
in your course to reach desired learning outcomes.

Signature Assignments
What are signature assignments?

<table>
<thead>
<tr>
<th>What signature assignments are:</th>
<th>What signature assignments are not:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Representative of student learning in the course</td>
<td>• Single assignments (i.e. in-class work, low-stakes assignments, etc.)</td>
</tr>
<tr>
<td>• Authentic and meaningful learning experiences</td>
<td>• The “most weighted” or “highest point” assignments</td>
</tr>
<tr>
<td>• Connected to learning outcomes of both the course and GE curricular categories and attribute(s)</td>
<td>•Disconnected from learning outcomes</td>
</tr>
<tr>
<td>• A chance for students to either explore a perspective, build a connection, and/or use an attribute as a tool for learning</td>
<td>• Easily removed from the course</td>
</tr>
</tbody>
</table>
Signature Assignments are opportunities for students to demonstrate at least one key learning outcome from a GE course. These assignments emphasize perspective-taking and/or multidisciplinary-perspective taking and the course attributes.

Examples include:

- Reflections (written, oral, artistic, multimedia)
- Presentations (oral, visual, musical, artistic)
- Compositions (infographics, lab reports, annotated bibliographies)
- Research projects
- Service learning or community-engaged projects
- Social, economic, or environmental justice projects
- Creative endeavors (artistic, design, technological, problem solving)

There is no media/modality requirement for signature assignments – instead we encourage instructors to shape the assignment based on learning outcomes.
Tips and Tricks

1. Make sure you align your learning outcomes with your signature assignment
   a. Example: Stephan

2. Make sure you are not just copying and pasting your assignment prompt but explaining its context and purpose to UWGEC (your audience)

3. Make sure you describe how signature assignment(s) and course objectives fulfill not only your BC/EP category but also attributes

Pedagogical Approach
Pedagogical Approach

Description of Teaching Practices:

- Exposing students to a range of BIPOC (Black, Indigenous, + People of Color) voices and writers
- Student autonomy / agency

Contextualizing Teaching Practices/Activities:

- Students will read literacy narratives from Roxanne Gay and Amy Tan about the experience of education on their sense of selves and language practices and will respond to reflective questions about how race and education have shaped their own understanding of “Standardized English”
- In the signature assignment, students will have agency over the genre of writing they are presenting their information in. For example, business students can opt to write a product report and public health students can translate their topic into an infographic in order to connect to audiences students will write for in their future professions and align with personal learning goals.
